

ELECTRICAL or ELECTROMECHANICAL DESIGN DRAFTER / DESIGN ENGINEER

ready to decarbonize the industry

Who we are:

ID Partner develops low carbon solutions to contribute into reindustrialization of France and Europe. We address ourselves to the so-called process industries: food, chemicals, cosmetics, spirits. The solutions we are developing (induction systems) combine know-how and cross-cutting technologies, covering both chemistry and electromagnetism. The success of the project requires very strong collaboration in a multidisciplinary and multinational team. We are hiring to accelerate our development.

We are strengthening our design office by creating the position of an "electrical or electromechanical design drafter / design engineer".

Job offer:

Under the responsibility of the head of our design office you:

- Take in charge electrical CAD: systems from 3kVA to 1MVA
- Dimension the electromagnetic systems: motor, coil, transformer
- Adapt the programs on PLCs according to the applications
- Find and define: references of electrotechnical components and associated suppliers
- Manage after-sales service on our site, but also remotely
- Take responsibility for the management and application of the low voltage directive on our products
- Carry out commissioning on sites in France and possibly abroad
- Take part in the product co-design meetings

You:

- You are very comfortable with all the disciplines of electricity, from power to automation
- You have a keen interest in product design
- You have good interpersonal skills
- You know how to work manually if necessary
- You are at ease with teamwork
- Any transversal skill (chemistry, mechanics, etc. or non-scientific discipline) is welcome
- French: B1 minimum, English: B2 minimum, Italian or another European language would be a plus.

If you are a young graduate, if you have an atypical career background, we will be happy to welcome you. We know that you have knowledge, we will support you so that you can quickly use it and take on the responsibilities of this position, which will allow you to directly contribute to the ecological transition.

Permanent job position, to be taken immediately.

Salary: according to the profile
